Market Pulse: End of H1 2026 reporting cycle. Expat summer travel and high overseas school fee payments create short-term redemption headwinds on flexible saving bonds.

2. PRODUCT-BY-PRODUCT COMMERCIAL TRAJECTORY

Product Name	Active Savers	Net Inflows	Target Plan	Variance	Health Status
Term Sukuk (Fixed Income)	5,311	AED 520.19M	AED 582.16M	-10.6%	EARLY WARNING

Booster Plan	6,903	AED 26.49M	AED 21.68M	+22.2%	OPTIMAL
Second Salary (Regular Savings)	2,017	AED 2.66M	AED 3.79M	-29.8%	CRITICAL BREACH

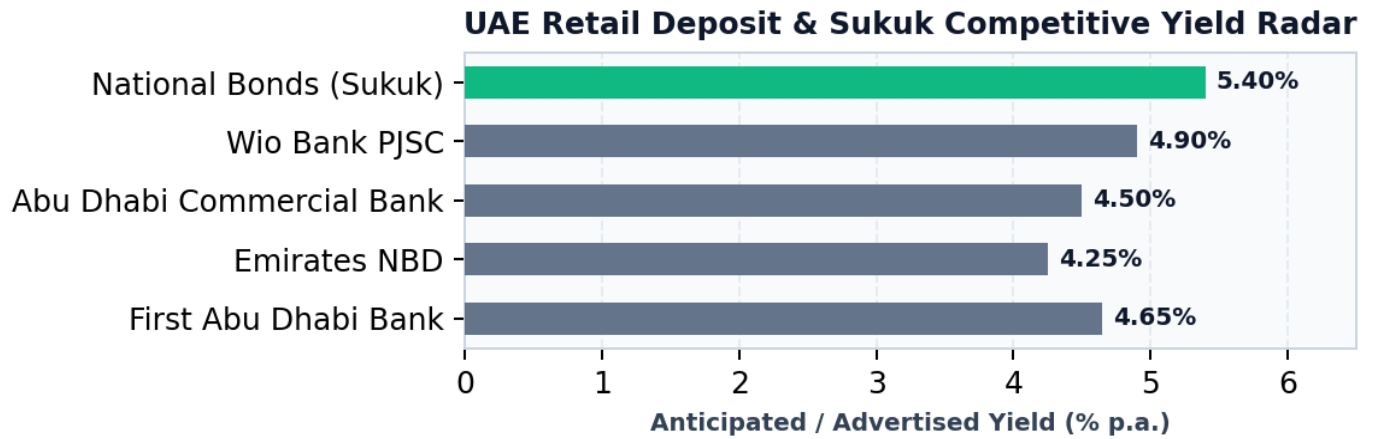

3. CROSS-INDICATOR CORRELATIONS & COMPETITIVE DYNAMICS

Fixed-Yield Flight to Quality

Lowering 3M EIBOR (4.52%) has accelerated institutional and HNW demand for Term Sukuk and Booster Plan as savers lock in fixed rates before expected Central Bank cuts.

Retail Savings Disintermediation

Digital Challenger banks (Wio at 5.25%, FAB iSave at 5.10%) are intensifying liquid deposit competition, creating temporary net outflow headwinds on standard Saving Bonds.

4. EMERGING RISKS & WATCH ITEMS

[!] **ALERT:** Elevated Liquidity Run-Off: Total redemptions crossed AED 250M threshold driven by seasonal expat commitments.

[!] **ALERT:** Material Deficit Alert: Second Salary (Regular Savings) breached -15% budget tolerance in 2026-06.

[!] **ALERT:** Monetary Policy Sensitivity: CBUAE base rate at 4.65% requires ALCO review of high-yield promotional tiers.

5. RECOMMENDED COMMERCIAL MANAGEMENT DECISIONS

- 1. Direct Sales Focus: Accelerate Second Salary corporate employee scheme partnerships across government-linked entities.
- 2. Liquidity Defense: Deploy targeted +35 bps Milestone Retention Bonus on maturing 12-month Booster Plan certificates.
- 3. Marketing Optimization: Reallocate 20% of digital paid acquisition budget from generic display into high-converting payroll savings campaigns.
